

## GREEN ERA-HUB

on Agri-Food and Biotechnology

**The Green ERA-Hub (GEH) brings together 15 currently active ERA-Nets (Cofunds), self-sustained networks and EJP in the Agri-food and biotechnology sector**

The GEH provides clear perspectives for ERA-Nets, ERA-Net Cofunds, national research funders and researchers in the Agri-food and biotechnology sector to find dedicated support at the level of information, communication, cooperation, networking and joint transnational funding that best fits their needs. The GEH will contribute to maintaining and strengthening EU's highly competitive position in Agri-food and biotechnology research. Broadening collaboration in future joint activities within and outside Europe, including calls and broadened recommendations for future EU partnerships within the mandate of the GEH will be highlighted.

The goal of the GEH is to maintain the momentum and experience gained over the last 20 years of transnational research Programming and strengthening Europe's highly competitive position in agri-food and biotechnology research.

# 29

co-ordination active and ended predecessor actions

# 1100+

Mio Euro funding

# 89

transnational calls

## The activities of the GEH are to:

- continue to build on previous achievements and further enhance cross-sector collaborations between Agri-Food and Biotechnology ERA-Nets, through implementation of new joint calls resulting in the funding of transnational collaborative projects;
- continue valorisation and implementation of other joint activities supporting the market, regulatory or societal uptake of results after the end of individual ERA-Nets;
- identify common research and innovation priorities, agreed upon by the participating national programmes, and address them via new joint calls;
- preserve best practice and managerial competences;
- contribute to the planning and complement the implementation of the new HEU Partnerships and Missions;
- broaden the actions and impact of initiatives towards stakeholders and in terms of geographical coverage;
- contribute to achieve the strategic goals of the SDGs, in particular zero hunger, industry innovation and infrastructure, responsible consumption and production, life on land, partnership for the goals, the Farm2Fork Strategy and EU's Green Deal.
